

Compact Bucket Systems

Versatile multiple bucket system for use with Contec's flat and curved mops

Contec's autoclavable Compact Bucket System is an all-in-one solution to make cleaning and disinfecting easier and more efficient. The cart is designed for use with Contec mops such as the VertiKlean® MAX™, VertiKlean® MAX™ Sealed Edge, EasyCurve® and QuickTask™ Mopping Systems.

The stainless steel cart is available in multiple configurations to meet the unique needs of your environment. It is available with either two or three autoclavable buckets and a choice of a standard or utility cart handle. The utility handle allows two small buckets (1.6 gallon) or one large bucket (3.9 gallon) to be positioned on the handle providing additional storage for extra supplies such as clean mop heads, solution spray bottles, wipes, and other items as needed.

The cart frame has an integrated mop head removal tool on the front for easy, hands-free removal of a VertiKlean MAX or VertiKlean MAX Sealed Edge mop head. An optional hands-free removal tool is also available for both the VertiKlean MAX mop heads and the QuickTask mop heads. Two mop holders with handle clasps on either side of the cart allow for convenient mop storage during transport and storage.

The polypropylene buckets are provided with stainless steel debris screens. The screen is positioned in the base of the clean and rinse buckets and prevents the mop from touching the bottom of the bucket where unwanted contaminants settle.

| Features | Benefits |
|---|---|
| On cart storage for two mop handles and frames | <ul style="list-style-type: none">• Allows convenient storage of two mop handles and frames keeping mops out of the way• Keeps mops readily at hand when changing locations |
| Four rotating, lockable caster | <ul style="list-style-type: none">• Provide excellent maneuverability, ideal for small cleanrooms and tight spaces |
| Compact polypropylene buckets with integral drip cap | <ul style="list-style-type: none">• Keeps buckets in place while in use and prevents drips between the buckets and floor• Buckets can hold a curved or flat wringer for curved or flat mops |
| Integral mop head removal tool or optional hands-free mop head removal tool | <ul style="list-style-type: none">• Allows easy hands-free removal of the VertiKlean MAX and QuickTask mop heads• Used mop heads can easily be discarded |
| 100% autoclavable, electropolished stainless steel cart | <ul style="list-style-type: none">• Safe for autoclave at 121°C for 30 minutes allowing it to be used in the most critical environments• Compatible with most cleanroom disinfectants and cleaners |

Product Features

Integral mop head removal tool

Each size of cart has an integral stainless steel mop head removal tool on the front for easy removal of a VertiKlean MAX or MAX Sealed Edge mop heads.

Optional hands-free mop head removal tool: 2639

An optional hands-free removal tool is also available to use with the VertiKlean MAX and VertiKlean SE mop heads. This stainless steel tool simply hangs on the back of the cart and includes a frame for holding disposal bags.

The waste bag holder can be used with sterile or nonsterile waste bags for complete hands free removal and disposal of dirty mop heads.

Optional hands-free mop head removal tool: 2940

An optional hands-free removal tool is also available to use with the range of QuickTask Mop Heads. This stainless steel tool simply hangs on the back of the cart and includes a frame for holding disposal bags.

The waste bag holder can be used with sterile or nonsterile waste bags for complete hands free removal and disposal of dirty mop heads. In order to use this hands-free option, the QuickTask magnetic mop head frames must be used, 2906 (stainless steel) and 2699P (polypropylene).

Integral mop holders

Two mop holders with handle clasps on either side of the cart allow for convenient mop storage during transport and storage.

Integral debris screens

The polypropylene buckets are provided with stainless steel debris screens. The screen is positioned in the base of the clean and rinse buckets and prevents the mop from touching the bottom of the bucket where unwanted contaminants settle.
